The Flumpf, a drain-dwelling creature, is often overlooked and underappreciated. Its fur is matted and greasy since it resides in sewers. Despite its repugnant stench, the Flumpf makes a loyal and loving pet – you may even find yourself wanting to cuddle up to it! Many Flumpfs sadly remain untamed. It is worth asking your water company to check your drains (it takes a trained professional to safely lift the manhole covers).

The Poogle can be deceptively cute until it opens its mouth, which is full of large, dagger-like teeth. Most will only eat meat since greenery can have unpleasant side effects. Though generally sweet-natured, the Poogle's character can drastically change if given the wrong food. Most vegetables will have even the most docile of Poogles tearing at the furniture and terrorising small children. As a result, all Poogle purchases come complete with a starter pack of meats (enough to last a fortnight) and a list of foods to avoid.
